SUMMARY

3rd-year Computer Engineering student experienced in building production-grade real-time systems and REST APIs (PulseLink) and prototyping AI-powered tools (AI Web Intelligence Agent). Solved 50+ problems on LeetCode; active open-source contributor (Hacktoberfest 2025). Seeking a Software Development / Full-Stack internship.

EDUCATION

Dr. D.Y. Patil Institute of Technology, Pimpri, Pune

2024 – 2028

Bachelor of Engineering (BE), Computer Engineering — CGPA: 8.9 / 10 — 3rd Year

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, HTML, CSS, SQL

Frameworks & Libraries: Node.js, Express.js, FastAPI, React

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, VS Code, Vercel

Core CS: Data Structures & Algorithms, DBMS, REST APIs

PROJECTS

PulseLink — Real-Time Emergency Blood Response Platform

Next.js · Express.js · MongoDB Atlas · Socket.IO · Leaflet.js · JWT

[GitHub](#) | [Live Demo](#)

- Built a real-time emergency blood dispatch platform connecting donors, hospitals, and blood banks, cutting coordination time from 2–3 hours to under 2 minutes.
- Engineered a geospatial donor-matching engine scoring candidates by proximity, availability, and response history, with automatic radius escalation.
- Delivered real-time alerts and live tracking via Socket.IO and Leaflet.js, covering all 8 blood-group compatibility rules across 3 user roles — donor, requester, and hospital.
- Built role-based JWT authentication using httpOnly cookies and a live analytics dashboard tracking response times, fulfillment rates, and blood-group demand.

AI Web Intelligence Agent — Anakin Hackathon — Prototype

React (Vite) · Express.js · Node.js · LLM Integration · Web Search & Scraping

[GitHub](#) | [Live Demo](#)

- Prototyped an AI-powered web intelligence agent at the Anakin Hackathon that searches the web, scrapes relevant content, and uses an LLM to analyze and summarize findings.
- Designed a modular Express.js backend with separate search, scraping, and LLM services, connected to a React (Vite) frontend client.
- Implemented secure API key handling via environment variables across the search, scraping, and LLM integration layers.

POSITIONS OF RESPONSIBILITY

External Affairs Officer — Acunetix Club

2025 – 2026

- Led sponsor outreach and acquisition for the club, coordinating with sponsors, guest speakers, and partner organizations to fund and support club events, and representing the club in inter-college collaborations.

ACHIEVEMENTS & EXTRACURRICULARS

- Solved 50+ problems on LeetCode, strengthening core DSA skills.
- Hacktoberfest 2025 — 6 merged PRs to open-source repos, including a bug fix for file handling in expressjs/multer (Node.js file-upload middleware), study material additions, and a small utility project.
